

DOLPHIN LODGE

The Dolphin Lodge is located on the margin of the Rio Mamori, about 78 km. south east of Manaus, more or less three and a half hours travelling, done in three parts. First transfer from airport of hotel to the riverport 'Ceasa' followed by a 20-minute speedboatride to the small village Careiro Castanho, passing the 'meeting of the waters' where Rio Negro and Rio Solimões meet and the Rio Amazon begins.

The second part is by minivan on the Manaus – Porto Velho highway and the third and last part by speedboat again on the Rio Açara untill the Dolphin Lodge. During this boatride you will see many creeks and numerous birds and other than the landscapes you will have the opportunity to appreciate the rich biodiversity of this area.

Location and structure:

The Dolphin Lodge is located in a region fully preserved with loads of dolphins, birds, monkeys, caymans and other animals of the Amazon region. The structure is rustic with wooden buildings with thatched roofs, divided in 6 modules:

- 1st module: reception, restaurant/bar and kitchen
- 2nd module: cottage with 6 double rooms with private bathrooms and balconies
- 3rd module: cottage with 2 triple rooms with private bathrooms and balconies
- 4th module: resting area with a straw roof with hammocks for rest
- 5th and 6th module: triple room blockhouse-style (built over the river) with balcony rains and river view

All buildings are fully protected with insectnets for the best possible comfort during your stay. During breaktimes we have wonderful areas where you can relax in a hammock.

Seringueira Package (02 days / 01 night)
